Acetylenic alcohols		Aging tests	
Inhibition of acid corrosion of nickel by acetylenic alcohols Frignani <i>et al.</i>	71	Railway signal wire insulation investigations and monitoring of degradation undertaken by London Underground Carter	184
Acid corrosion		Al 6013-20SiC _p composite	
Inhibition of acid corrosion of nickel by acetylenic alcohols Frignani <i>et al.</i>	71	Effect of velocity and elevated temperature on pitting of Al 6013-20SiC _p composite in 3.5 wt-%NaCl Ahmad and Abdul Aleem	230
Age hardening		Alumina	
Effect of velocity and elevated temperature on pitting of Al 6013-20SiC _p composite in 3.5 wt-%NaCl Ahmad and Abdul Aleem	230	Effect of prior conversion treatment on high temperature oxidation behaviour of ceramic coated 17Cr ferritic stainless steel Ariès <i>et al.</i>	281

Aluminium alloys			
Pitting corrosion on aluminium in absence of chloride	219		
Blackwood and Chong			
Influence of chloride on deposition of copper on 6063 aluminium alloy	225		
Blackwood and Chong			
Amidoamines			
Time dependence of inhibiting effect of amidoamines in CO ₂ saturated chloride solutions	309		
Esih <i>et al.</i>			
Anticorrosive coatings			
Novel configurations for electrochemical noise measurements	158		
Mabbutt and Mills			
Arrhenius type analysis			
Railway signal wire insulation investigations and monitoring of degradation undertaken by London Underground	184		
Carter			
Atmospheric corrosion			
Classification of atmospheric corrosivity in humid tropical climates	53		
Veleva and Maldonado			
Characterisation of corrosivity in indoor atmospheres with different metals and evaluation techniques	59		
Johansson <i>et al.</i>			
Austenite phases			
Hydrogen embrittlement of 22-5 duplex stainless steel	49		
Elshawesh and Scully			
Bayrite			
Effect of velocity and elevated temperature on pitting of Al 6013-20SiC _p composite in 3.5 wt-%NaCl	230		
Ahmad and Abdul Aleem			
Benzotriazole			
Benzotriazole as corrosion inhibitor for type 304 stainless steel in water-ethanol media containing 2M H ₂ SO ₄	211		
Rodriguez <i>et al.</i>			
Biofilms			
Physical factors influencing bacterial fouling of type 304 and 316 stainless steels	121		
Percival <i>et al.</i>			
Review of potable water biofilms in engineered systems	130		
Percival			
Biofouling			
Comparative study of stainless steel and related alloy corrosion in natural sea water	111		
Neville and Hodgkiess			
Physical factors influencing bacterial fouling of type 304 and 316 stainless steels	121		
Percival <i>et al.</i>			
Review of potable water biofilms in engineered systems	130		
Percival			
Biological corrosion			
Biological corrosion of metallic parts in underground irrigation system: study of alternative materials	237		
Yfantis <i>et al.</i>			
Calcium gluconate			
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 3: Coinhibitors and synergism	152		
Abd El Kader <i>et al.</i>			
Calcium gluconate as corrosion inhibitor for mild steel in low chloride media	315		
Rajendran <i>et al.</i>			
Cathodic hydrogenation			
Electrochemical corrosion characterisation of inter-metallic phases occurring in Nd-Fe-B type magnets	37		
Bala <i>et al.</i>			
Cathodic protection			
Study of corrosion product of zinc in natural sea water	77		
Venkatesan			
Current densities for cathodic protection of steel in tropical sea water	206		
Hoe and Roy			
Cathodic reduction			
Characterisation of corrosivity in indoor atmospheres with different metals and evaluation techniques	59		
Johansson <i>et al.</i>			
Ceramic pastes			
Effect of ceramic heat insulating paste on degree of sensitisation of AISI type 304 stainless steel	318		
Qiu			
Cleavage fracture			
Hydrogen embrittlement of 22-5 duplex stainless steel	49		
Elshawesh and Scully			
Coatings			
Effect of prior conversion treatment on high temperature oxidation behaviour of ceramic coated 17Cr ferritic stainless steel	281		
Ariès <i>et al.</i>			
Copper			
Classification of atmospheric corrosivity in humid tropical climates	53		
Veleva and Maldonado			
Characterisation of corrosivity in indoor atmospheres with different metals and evaluation techniques	59		
Johansson <i>et al.</i>			
Pitting corrosion on aluminium in absence of chloride	219		
Blackwood and Chong			
Influence of chloride on deposition of copper on 6063 aluminium alloy	225		
Blackwood and Chong			
Corrosion education			
Development of EFC through international cooperation, transfer of knowledge, and education	278		
Mercer			
Corrosion monitoring			
Novel configurations for electrochemical noise measurements	158		
Mabbutt and Mills			
Current density			
Current densities for cathodic protection of steel in tropical sea water	206		
Hoe and Roy			
Diene rubbers			
Railway signal wire insulation investigations and monitoring of degradation undertaken by London Underground	184		
Carter			
Distilled water			
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 1: Behaviour in distilled water	139		
Abd El Kader <i>et al.</i>			
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 3: Coinhibitors and synergism	152		
Abd El Kader <i>et al.</i>			
Dual electrolytes			
Alternate layers of zinc and nickel electrodeposited to protect steel	197		
Kalantary <i>et al.</i>			
Electrochemical behaviour			
Comparative study of stainless steel and related alloy corrosion in natural sea water	111		
Neville and Hodgkiess			
Pitting corrosion on aluminium in absence of chloride	219		
Blackwood and Chong			
Influence of chloride on deposition of copper on 6063 aluminium alloy	225		
Blackwood and Chong			
Effect of molybdate ions as corrosion inhibitors of iron in neutral aqueous solutions	302		
Meziane <i>et al.</i>			
Time dependence of inhibiting effect of amidoamines in CO ₂ saturated chloride solutions	309		
Esih <i>et al.</i>			
Electrochemical noise analysis			
Electrochemical noise for evaluating susceptibility of lead-acid battery electrodes to intergranular corrosion	29		
Lehockey <i>et al.</i>			
Novel configurations for electrochemical noise measurements	158		
Mabbutt and Mills			
Electrochemical studies of hot corrosion of type 347H stainless steel	288		
Almeraya-Calderon <i>et al.</i>			
Electrochemical polarisation			
Sulphide corrosion of alloy steels in chloride solutions: potentiokinetic investigations	103		
Szyppowski			
Electrodeposition			
Alternate layers of zinc and nickel electrodeposited to protect steel	197		
Kalantary <i>et al.</i>			
Electrolytic deposits			
Effect of prior conversion treatment on high temperature oxidation behaviour of ceramic coated 17Cr ferritic stainless steel	281		
Ariès <i>et al.</i>			
Embrittlement			
Relationship between susceptibility to embrittlement and hydrogen permeation current for UNS G10190 steel in 5%NaCl solution containing H ₂ S	292		
Zhang and Du			

Environments		
Acids		
Effects of concentration and temperature on corrosion resistance of nickel base alloys in acidic environments Singh	67	
Chlorides		
Pitting corrosion behaviour of AISI 316L steel in chloride containing solutions Abd El Meguid <i>et al.</i>	42	
Pitting corrosion on aluminium in absence of chloride Blackwood and Chong	219	
Influence of chloride on deposition of copper on 6063 aluminium alloy Blackwood and Chong	225	
Relationship between susceptibility to embrittlement and hydrogen permeation current for UNS G10190 steel in 5%NaCl solution containing H ₂ S Zhang and Du	292	
Time dependence of inhibiting effect of amidoamines in CO ₂ saturated chloride solutions Esih <i>et al.</i>	309	
Calcium gluconate as corrosion inhibitor for mild steel in low chloride media Rajendran <i>et al.</i>	315	
Sea water		
Study of corrosion product of zinc in natural sea water Venkatesan	77	
Comparative study of stainless steel and related alloy corrosion in natural sea water Neville and Hodgkiss	111	
Sodium chloride		
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 2: Behaviour in NaCl and H ₂ SO ₄ Abd El Kader <i>et al.</i>	145	
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 3: Coinhibitors and synergism Abd El Kader <i>et al.</i>	152	
Sodium sulphate		
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 2: Behaviour in NaCl and H ₂ SO ₄ Abd El Kader <i>et al.</i>	145	
Sulphuric acid		
Benzotriazole as corrosion inhibitor for type 304 stainless steel in water-ethanol media containing 2M H ₂ SO ₄ Rodrigues <i>et al.</i>	211	
Tropical climates		
Classification of atmospheric corrosivity in humid tropical climates Veleva and Maldonado	53	
Ferrite phases		
Hydrogen embrittlement of 22-5 duplex stainless steel Elshawesh and Scully	49	
Fracture mechanics		
Improved sour gas resistance of X-80 steel after quenching and tempering Albarran <i>et al.</i>	202	
High temperature		
Effects of concentration and temperature on corrosion resistance of nickel base alloys in acidic environments Singh	67	
Hot corrosion		
Electrochemical studies of hot corrosion of type 347H stainless steel Almeraya-Calderon <i>et al.</i>	288	
H ₂ S		
Sulphide corrosion of alloy steels in chloride solutions: potentiokinetic investigations Szyproski	103	
Relationship between susceptibility to embrittlement and hydrogen permeation current for UNS G10190 steel in 5%NaCl solution containing H ₂ S Zhang and Du	292	
Hydrogen embrittlement		
Hydrogen embrittlement of 22-5 duplex stainless steel Elshawesh and Scully	49	
Improved sour gas resistance of X-80 steel after quenching and tempering Albarran <i>et al.</i>	202	
Hydrogen permeation		
Influence of substituent groups on performance of <i>N</i> -benzylidene phenylamine- <i>N</i> -oxide as corrosion inhibitor of mild steel in acidic solutions Hariharaputhran <i>et al.</i>	214	
Relationship between susceptibility to embrittlement and hydrogen permeation current for UNS G10190 steel in 5%NaCl solution containing H ₂ S Zhang and Du	292	
Impedance		
Influence of substituent groups on performance of <i>N</i> -benzylidene phenylamine- <i>N</i> -oxide as corrosion inhibitor of mild steel in acidic solutions Hariharaputhran <i>et al.</i>	214	
Indoor field exposure		
Characterisation of corrosivity in indoor atmospheres with different metals and evaluation techniques Johansson <i>et al.</i>	59	
Inhibition time dependence		
Time dependence of inhibiting effect of amidoamines in CO ₂ saturated chloride solutions Esih <i>et al.</i>	309	
Inhibitors and inhibition		
Inhibition of acid corrosion of nickel by acetylenic alcohols Frignani <i>et al.</i>	71	
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 1: Behaviour in distilled water Abd El Kader <i>et al.</i>	139	
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 2: Behaviour in NaCl and H ₂ SO ₄ Abd El Kader <i>et al.</i>	145	
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 3: Coinhibitors and synergism Abd El Kader <i>et al.</i>	152	
Thermometric, gravimetric, and potentiometric study of corrosion of iron under conditions of reaction $Fe + 2Fe^{3+} = 3Fe^{2+}$ Shams El Din and Arain	189	
Benzotriazole as corrosion inhibitor for type 304 stainless steel in water-ethanol media containing 2M H ₂ SO ₄ Rodrigues <i>et al.</i>	211	
Influence of substituent groups on performance of <i>N</i> -benzylidene phenylamine- <i>N</i> -oxide as corrosion inhibitor of mild steel in acidic solutions Hariharaputhran <i>et al.</i>	214	
Synergistic influence of iodide ions on inhibition of corrosion of mild steel in H ₂ SO ₄ by <i>N</i> -phenyl thiourea Syed Azim <i>et al.</i>	297	
Effect of molybdate ions as corrosion inhibitors of iron in neutral aqueous solutions Meziane <i>et al.</i>	302	
Time dependence of inhibiting effect of amidoamines in CO ₂ saturated chloride solutions Esih <i>et al.</i>	309	
Calcium gluconate as corrosion inhibitor for mild steel in low chloride media Rajendran <i>et al.</i>	315	
Intergranular corrosion		
Electrochemical noise for evaluating susceptibility of lead-acid battery electrodes to intergranular corrosion Lehockey <i>et al.</i>	29	
Intermetallic phases		
Electrochemical corrosion characterisation of intermetallic phases occurring in Nd-Fe-B type magnets Bala <i>et al.</i>	37	
Iron		
Thermometric, gravimetric, and potentiometric study of corrosion of iron under conditions of reaction $Fe + 2Fe^{3+} = 3Fe^{2+}$ Shams El Din and Arain	189	
Langmuir adsorption isotherm		
Synergistic influence of iodide ions on inhibition of corrosion of mild steel in H ₂ SO ₄ by <i>N</i> -phenyl thiourea Syed Azim <i>et al.</i>	297	
Lead-acid batteries		
Electrochemical noise for evaluating susceptibility of lead-acid battery electrodes to intergranular corrosion Lehockey <i>et al.</i>	29	
Local strain rate		
Material factors influencing notch tip strain rate Toribio	23	
Molybdate ions		
Effect of molybdate ions as corrosion inhibitors of iron in neutral aqueous solutions Meziane <i>et al.</i>	302	
Multilayers		
Alternate layers of zinc and nickel electrodeposited to protect steel Kalantary <i>et al.</i>	197	

Mylius thermometric technique		
Thermometric, gravimetric, and potentiometric study of corrosion of iron under conditions of reaction $\text{Fe} + 2\text{Fe}^{3+} = 3\text{Fe}^{2+}$ Shams El Din and Arain	189	
Nd-Fe-B magnets		
Electrochemical corrosion characterisation of intermetallic phases occurring in Nd-Fe-B type magnets Bala <i>et al.</i>	37	
N-phenyl thiourea		
Synergistic influence of iodide ions on inhibition of corrosion of mild steel in H_2SO_4 by N-phenyl thiourea Syed Azim <i>et al.</i>	297	
Nickel		
Characterisation of corrosivity in indoor atmospheres with different metals and evaluation techniques Johansson <i>et al.</i>	59	
Inhibition of acid corrosion of nickel by acetylenic alcohols Frignani <i>et al.</i>	71	
Nickel base alloys		
Effects of concentration and temperature on corrosion resistance of nickel base alloys in acidic environments Singh	67	
Nitrones		
Influence of substituent groups on performance of N-benzylidene phenylamine-N-oxide as corrosion inhibitor of mild steel in acidic solutions Hariharaputhran <i>et al.</i>	214	
Notch tip strain rate		
Material factors influencing notch tip strain rate Toribio	23	
Notched specimens		
Material factors influencing notch tip strain rate Toribio	23	
Organic coatings		
Novel configurations for electrochemical noise measurements Mabbutt and Mills	158	
Permanent magnets		
Electrochemical corrosion characterisation of intermetallic phases occurring in Nd-Fe-B type magnets Bala <i>et al.</i>	37	
Pitting		
Pitting corrosion behaviour of AISI 316L steel in chloride containing solutions Abd El Meguid <i>et al.</i>	42	
Pitting corrosion on aluminium in absence of chloride Blackwood and Chong	219	
Influence of chloride on deposition of copper on 6063 aluminium alloy Blackwood and Chong	225	
Effect of velocity and elevated temperature on pitting of Al 6013-20SiC _p composite in 3.5 wt-%NaCl Ahmad and Abdul Aleem	230	
Effect of σ phase on pitting corrosion of 22-5 duplex stainless steel Elshawesh <i>et al.</i>	285	
Polarisation curves		
Electrochemical studies of hot corrosion of type 347H stainless steel Almeraya-Calderon <i>et al.</i>	288	
Pollutants		
Characterisation of corrosivity in indoor atmospheres with different metals and evaluation techniques Johansson <i>et al.</i>	59	
Polymer degradation		
Railway signal wire insulation investigations and monitoring of degradation undertaken by London Underground Carter	184	
Potentiodynamic polarisation		
Effects of concentration and temperature on corrosion resistance of nickel base alloys in acidic environments Singh	67	
Public health		
Review of potable water biofilms in engineered systems Percival	130	
Quasicleavage fracture		
Hydrogen embrittlement of 22-5 duplex stainless steel Elshawesh and Scully	49	
Reactivation		
Effect of ceramic heat insulating paste on degree of sensitisation of AISI type 304 stainless steel Qiu	318	
Sacrificial anodes		
Current densities for cathodic protection of steel in tropical sea water Hoe and Roy	206	
Sensitisation		
Effect of ceramic heat insulating paste on degree of sensitisation of AISI type 304 stainless steel Qiu	318	
Sigma phase		
Effect of σ phase on pitting corrosion of 22-5 duplex stainless steel Elshawesh <i>et al.</i>	285	
Silver		
Characterisation of corrosivity in indoor atmospheres with different metals and evaluation techniques Johansson <i>et al.</i>	59	
Slow strain rate testing		
Material factors influencing notch tip strain rate Toribio	23	
Sodium benzoate		
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 3: Coinhibitors and synergism Abd El Kader <i>et al.</i>	152	
Sodium glycerophosphate		
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 3: Coinhibitors and synergism Abd El Kader <i>et al.</i>	152	
Sodium tungstate		
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 1: Behaviour in distilled water Abd El Kader <i>et al.</i>	139	
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 2: Behaviour in NaCl and H_2SO_4 Abd El Kader <i>et al.</i>	145	
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 3: Coinhibitors and synergism Abd El Kader <i>et al.</i>	152	
Soil corrosivity		
Biological corrosion of metallic parts in underground irrigation system: study of alternative materials Yfantis <i>et al.</i>	237	
Steels		
Carbon steels		
Classification of atmospheric corrosivity in humid tropical climates Veleza and Maldonado	53	
Relationship between susceptibility to embrittlement and hydrogen permeation current for UNS G10190 steel in 5%NaCl solution containing H_2S Zhang and Du	292	
Effect of molybdate ions as corrosion inhibitors of iron in neutral aqueous solutions Meziane <i>et al.</i>	302	
Duplex stainless steels		
Hydrogen embrittlement of 22-5 duplex stainless steel Elshawesh and Scully	49	
Effect of σ phase on pitting corrosion of 22-5 duplex stainless steel Elshawesh <i>et al.</i>	285	
Microalloyed steels		
Improved sour gas resistance of X-80 steel after quenching and tempering Albarran <i>et al.</i>	202	
Mild steels		
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 1: Behaviour in distilled water Abd El Kader <i>et al.</i>	139	
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 2: Behaviour in NaCl and H_2SO_4 Abd El Kader <i>et al.</i>	145	
Corrosion inhibition of mild steel by sodium tungstate in neutral solution. Part 3: Coinhibitors and synergism Abd El Kader <i>et al.</i>	152

Stainless steels		
Pitting corrosion behaviour of AISI 316L steel in		

chloride containing solutions	Abd El Meguid <i>et al.</i>	42	Temkin adsorption isotherm	
Sulphide corrosion of alloy steels in chloride solutions: potentiokinetic investigations	Szyprowski	103	Influence of substituent groups on performance of <i>N</i> -benzylidine phenylamine- <i>N</i> -oxide as corrosion inhibitor of mild steel in acidic solutions	Hariharaputhran <i>et al.</i> 214
Comparative study of stainless steel and related alloy corrosion in natural sea water	Neville and Hodgkiss	111	Thermal barrier	
Physical factors influencing bacterial fouling of type 304 and 316 stainless steels	Percival <i>et al.</i>	121	Effect of prior conversion treatment on high temperature oxidation behaviour of ceramic coated 17Cr ferritic stainless steel	Ariès <i>et al.</i> 281
Benzotriazole as corrosion inhibitor for type 304 stainless steel in water-ethanol media containing 2M H ₂ SO ₄	Rodrigues <i>et al.</i>	211	Tropical corrosion data	
Effect of prior conversion treatment on high temperature oxidation behaviour of ceramic coated 17Cr ferritic stainless steel	Ariès <i>et al.</i>	281	Current densities for cathodic protection of steel in tropical sea water	Hoe and Roy 206
Electrochemical studies of hot corrosion of type 347H stainless steel	Almeraya-Calderon <i>et al.</i>	288	Velocity	
Effect of ceramic heat insulating paste on degree of sensitisation of AISI type 304 stainless steel	Qiu	318	Effect of velocity and elevated temperature on pitting of Al 6013-20SiC _p composite in 3.5 wt.-%NaCl	Ahmad and Abdul Aleem 230
Stress corrosion			Weight loss	
Material factors influencing notch tip strain rate	Toribio	23	Thermometric, gravimetric, and potentiometric study of corrosion of iron under conditions of reaction $\text{Fe} + 2\text{Fe}^{3+} = 3\text{Fe}^{2+}$	Shams El Din and Arain 189
Sulphide stress cracking			Zinc	
Improved sour gas resistance of X-80 steel after quenching and tempering	Albarran <i>et al.</i>	202	Characterisation of corrosivity in indoor atmospheres with different metals and evaluation techniques	Johansson <i>et al.</i> 59
Sulphur species			Study of corrosion product of zinc in natural sea water	Venkatesan 77
Pitting corrosion behaviour of AISI 316L steel in chloride containing solutions	Abd El Meguid <i>et al.</i>	42	Zirconia	
Surface analysis			Effect of prior conversion treatment on high temperature oxidation behaviour of ceramic coated 17Cr ferritic stainless steel	Ariès <i>et al.</i> 281
Physical factors influencing bacterial fouling of type 304 and 316 stainless steels	Percival <i>et al.</i>	121	Zn-Ni coatings	
Surface coverage			Alternate layers of zinc and nickel electrodeposited to protect steel	Kalantary <i>et al.</i> 197
Synergistic influence of iodide ions on inhibition of corrosion of mild steel in H ₂ SO ₄ by <i>N</i> -phenyl thiourea	Syed Azim <i>et al.</i>	297		
Synergistic corrosion inhibitors				
Synergistic influence of iodide ions on inhibition of corrosion of mild steel in H ₂ SO ₄ by <i>N</i> -phenyl thiourea	Syed Azim <i>et al.</i>	297
